**Tabulations from a February 2025 Poll of  
Los Angeles County Registered Voters About the Wildfires**

*by the*  
***Berkeley IGS Poll***  
**Institute of Governmental Studies**  
**University of California, Berkeley**

**February 17-26, 2025**

## About the Survey

The findings in this report are based on a *Berkeley IGS Poll* of Los Angeles County registered voters completed by the Institute of Governmental Studies (IGS) at the University of California, Berkeley on behalf of the *Los Angeles Times*. A total of 5,184 Los Angeles County registered voters completed the survey in English and Spanish February 17-26, 2025. This total included oversamples of 272 registered voters living in the Palisades fire zone and 293 registered voters living in the Eaton fire zone to enable the poll to examine and compare their reactions to the fires to other voters countywide. After the completion of data collection, the results from each oversampled region were weighted to realign them to estimates of their actual share of the county's registered voter population.

The poll was administered by distributing email invitations and text reminders to stratified random samples of Los Angeles County registered voters. Each email and text message reminder invited voters to participate in a non-partisan survey conducted by IGS and provided a link to the website where the survey questionnaire was housed. Prior to completing the survey questionnaire, voters were asked to give their consent to participate in the poll and were also provided with an opt out link for those not wishing to receive further email invitations and reminders.

Political Data, Inc. (PDI) provided IGS with stratified random samples of the email address and cell phone listings of Los Angeles County voters from information contained on the county's official voter registration rolls. PDI was also responsible for distributing the email invitations and text reminders to voters on behalf of IGS during data collection.

Mark DiCamillo, Director of the Berkeley IGS Poll, was responsible for overseeing all phases of the poll, working with IGS's co-directors and graduate student assistants and with PDI Vice President Paul Mitchell. Mr. DiCamillo also consulted with editors and reporters of the *Los Angeles Times* during the development of the survey questionnaire.

To protect the anonymity of respondents, voters' contact information and all other personally identifiable information derived from their voter listing were purged from the data file and replaced with a unique and anonymous identification number during data processing. Post-stratification weights were also applied to the survey data file to align the registered voter sample to population characteristics of Los Angeles County voters both countywide and within major regions of the county.

The sampling error associated with the survey results is difficult to calculate precisely because of pre-survey stratification of the sample listings and post-survey weighting. Nevertheless, it is likely that findings based on the overall Los Angeles County voter sample are subject to an estimated sampling error of approximately +/-2 percentage points at the 95% confidence level, while estimates of the sampling error for each of the Palisades and Eaton fire zone subsamples are +/- 4 percentage points.

## About the Institute of Governmental Studies

The Institute of Governmental Studies (IGS) is an interdisciplinary organized research unit that pursues a vigorous program of research, education, publication and public service. A component of the University of California system's flagship Berkeley campus, IGS is the oldest organized research unit in the UC system and the oldest public policy research center in the state. IGS's co-directors are Professor Eric Schickler and Associate Professor G. Cristina Mora.

IGS conducts periodic surveys of public opinion in California on matters of politics and public policy through its *Berkeley IGS Poll*. The poll seeks to provide a broad measure of contemporary public opinion, and to generate data for subsequent scholarly analysis. The director of the *Berkeley IGS Poll* is veteran pollster Mark DiCamillo. For a complete listing of stories issued by the *Berkeley IGS Poll* go to <https://www.igs.berkeley.edu/research/berkeley-igs-poll>.

# February 2025 Berkeley IGS Poll of Los Angeles County Registered Voters

Table 1: Q11 During the time of the fires, how much additional stress did the fires put on you personally? Please answer using scale of 1 to 10, where 1 means you felt no additional stress and 10 means you felt an extremely high level of additional stress? You can choose any number between 1 and 10 for your answer. (LA County Registered Voters)

Table 6: Q11 During the time of the fires, how much additional stress did the fires put on you personally? Please answer using scale of 1 to 10, where 1 means you felt no additional stress and 10 means you felt an extremely high level of additional stress? You can choose any number between 1 and 10 for your answer. (LA County Registered Voters)

	Fire Impact				Property Damage		Evac During Fire		Health Impacts			LA Quality of Life		Moving Consideration				Recovery Confidence

# February 2025 Berkeley IGS Poll of Los Angeles County Registered Voters

Table 1: Q22-1 As the Los Angeles region rebuilds, a number of proposals have been made about ways to reduce the dangers of wildfires for residences and businesses in the future. Please indicate whether you support or oppose each proposal. "Strengthen local building codes to make new homes more fire resistant, even if it adds to building costs" (LA County Registered Voters)
